Subject Dimock Update (1430hrs., 2/15/12)

One residence sampled this morning. This will be the last sampling event until March.

Sampling operations will be suspended while the analytical data is being received, reviewed and collated.

Three residences are currently scheduled to be sampled in March (3/5/12 and 3/6/12).

There are currently five outstanding residences that we are still attempting to schedule. Of these five, one will not be back in the area before April.

An additional well survey is scheduled for tomorrow 2/16/12. The resident is located between two residents that EPA has sampled. The resident contacted EPA regarding possible sampling and indicated that Cabot had conducted sampling of the residence in the past.

As of noon today: START has 11 personnel on-site. Assuming all samples are shipped today, all START personnel will demobe by the end of the day. 2 SERAS personnel will remain on-site for the remainder of the week to continue with data management. 3 ERRS personnel will remain on-site.

Alternate water delivery will continue.

As of noon:
